AL120S

High Accuracy Programmable Label Head

- Auto label detect and speed set-up for quick changeover
- Accuracy to $\pm 0.5\text{mm}$
- Reliable, consistent labelling
- Accuracy to $\pm 0.25\text{mm}$ using heavy duty stepper motor Standard Key Lock Security Access
- 25 easily stored programmable label settings for quick recall and reduced changeover time
- Variable speed to 76 metres per minute, 40 m/per minute standard Operator friendly display panel with direct function access touch buttons
- Remote mounted metal control box with wipe clean control panel Encoder for speed following of wrapping machines
- Choice of hot foil or thermal in line coders for Use By Dates, Batch nos, Bar codes etc
- Top, Side or Bottom mounted
- Left or right hand versions

AL120S High Accuracy Programmable Label Head

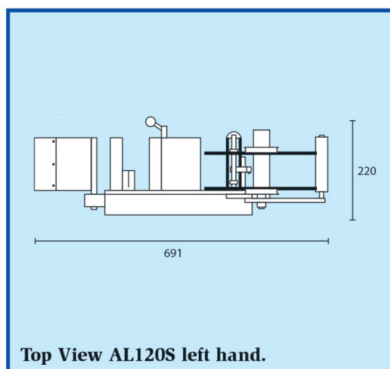

TECHNICAL SPECIFICATION

Speed:	Variable 1-40m/min standard, option for 76m/min
Motor:	Stepper motor, microprocessor controlled
Label width:	Max 120mm, 200mm, 250mm
Min. label size:	15mm x 15mm
Label Detection:	Fixed fork p.e. cell or clear label sensor, ultrasonic
Label Roll:	300mm diameter
Label core:	45mm or 76mm ID
Electrical supply:	220/240V. AC 50/60Hz
Memory capacity:	25 labels stored with Alpha/Numeric display standard, expandable to 50
Weight:.....	Approx 14kg excluding control box

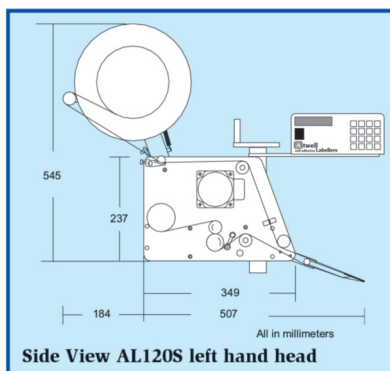

As part of our continuing policy of improvement we reserve the right to change this specification without notice.

OPTIONS

- Max 76m/minute linear speed
- Encoder for automatic speed following/label position
- 50 label programmable memory
- End of roll alarm/Warning light
- Blow-on unit for non contact applications
- Powered Dispensing Edge
- Hot foil or Thermal printers
- Bar code and vision system
- Service indicators
